DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of the species in which the disease is gastroespophageal reflux disease (GERD) in the reply filed on July 29, 2005 is acknowledged. The species have been expanded to include ulcers and conditions caused by or contributed to by gastric hypersecretion. Claim 6 is withdrawn as not reading on the elected species. Claims 1-5 and 7-15 are being examined.

Claim Objections

Claims 1 and 7-15 are objected to as reciting non-elected subject matter.

Claim Rejections - 35 USC § 112

Claims 1, 4, and 7-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not describe what conditions are included in the recitation "conditions caused by or contributed to by gastric hypersecretion." Is the recitation intended to include a cancer caused by gastric hypersecretion?

Claims 1-5, and 7-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear if the human being treated has a disease of claim 1. Furthermore, it is not clear if the human must have all conditions caused by or contributed to by gastric hypersecretion. Amending the claim to recite "a condition" will overcome this rejection.

Information Disclosure Statement

References CA-CJ were not available to the Examiner in the parent file and were not considered.

Prior Art of Record

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. HCAPLUS DN 123:132521 (Fort F et al), HCAPLUS DN 115:21996 (Inatomi N et al) and JICST-Eplus AN 961013832 (Nakamura K et al) disclose hydorxylansoprazole is a metabolite of lansoprazole, but do not render the instant invention obvious in the absence of additional information.
